Statement on prohibited substances

Professional athletes, teams and sporting events have trusted PowerBar as a sports nutrition partner since 1986. We have continually worked on surpassing the expectations of athletes and on offering sports nutrition products that are safe to consume within the framework of existing regulations.

We ensure, to the best of our knowledge, that no substances banned by the World Anti-Doping Agency are used in any of our production processes. Furthermore, no such substances are stored or processed in any of our production areas.

All PowerBar products are additionally shown in the Cologne List®, and as a result we can offer athletes even more security and trust. The Cologne List® is one of the leading service platforms that list sports nutrition products tested for prohibited substances under strict certification processes.

The Cologne List® publishes products that are tested for prohibited substances (anabolic steroids and stimulants) in a laboratory that specializes in this field, and is recognized worldwide.

This statement is valid for all PowerBar products sold by Active Nutrition International GmbH.

PowerBar products are manufactured in accordance with European and National legislation.
